

Quality Policy

We provide our customers with a single-source, quality solution for their precision metal fabrication, welding, finishing, assembly, and servicing process requirements, performed to their specifications, with subcontract services that meet their expectations.

Quality Comes First

This is accomplished by:

- ▶ Identifying and defining customer requirements and expectations.
- ▶ Providing a framework for the establishment and review of quality objectives.
- ▶ Continually improving our quality system.
- ▶ Maintaining a culture that encourages our personnel and associates to continuously enhance their abilities and technological capabilities.
- ▶ Meeting all necessary industry safety and workmanship standards.
- ▶ Providing an environment that focuses on defect prevention vs. detection.

Joseph F. Meade IV
President and Chief Executive Officer
